Neyland Stadium: Knoxville, TN - Installer: Ritz Interiors - Architect: McCarty Holsaple - Photographer: Shawn Weimer

SO LIGHT

Designing with Light

Lighting is essential to admiring beauty as it enhances the mood of a space. CLIPSO® offers solutions to incorporate superior lighting into your interior design projects.

Create a distinct design element with our luminous coverings available in three levels of translucency: 30%, 50% and 70%. Or incorporate excellent acoustic properties into your design with our Acoustic Translucent covering. All variations can be custom printed and some can be enhanced with Antibacterial coating.

Adding a light source behind a covering creates a distinct design element perfect for small or large-scale applications. We offer a range of color temperatures from 2700° K to 7000° K, RGB and RGBW color options, as well as tunable and dimmable options.

Take your vision to a whole new level with CLIPSO.

SO LIGHT

Good lighting helps to define an interior space. CLIPSO® is proud to offer infinite lighting design options.

Forest City: Cleveland, OH - Installer: Ketchum & Walton Co. - Architect: Vocon

Corporate lounge: Washington D.C. - Installer: Fabric Wall Concepts - Architect: MGAD

Create stylish and functional lighting elements with the CLIPSO system.

Complete luminous ceilings and walls have become very popular in modern design. Suspended clouds, partitions and wall frames also become beautiful design elements when illuminated. To help you achieve your design goals, CLIPSO offers a complete lighting solution which includes a consistent and fully-tested integrated light system.

Adding a print allows endless design opportunities. Invite the outdoors in with a custom sky print or other natural landscape scenery. Or use the opportunity to print a logo or other branding element for corporate or retail environments.

MJS Chapel: Pasadena, CA - Installer: MB Coatings - Architect: Tate Snyder Kimsey Architects

St. Elizabeth Hospital: Milwaukee, WI - Installer: The Huff Company, Inc.

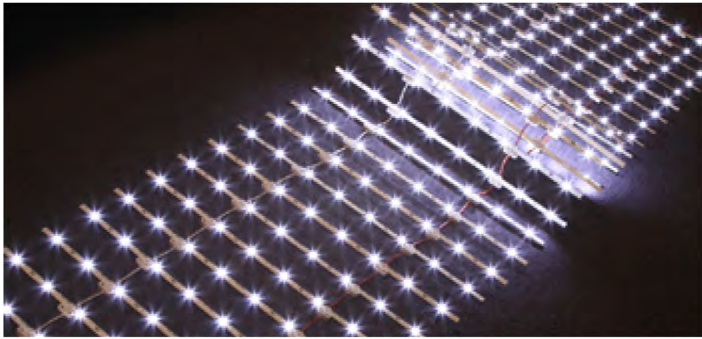

Hotel Elysee Palace: Paris, France - Installer: MJ Plafond - Designer: Nathalie Roux

SO LIGHT

Our lighting options include externally backlit, internal perimeter-mounted and internal surface-mounted solutions. Each has specific qualities that suit them to particular designs and constructions. Another option for specialty applications is fiber optic lighting, which is easily incorporated into the CLIPSO® system.

Surface-mounted LED

DLA Lighting Showroom: Philadelphia, PA – Installer: Unique Construction

Perimeter-mounted LED

America Center: San Jose, CA - Installer: Unique Construction

Acoustic Surface-mounted LED

Car dealership: Riyadh, Saudi Arabia

Launch Labs: Cambridge, MA - Installer: Allan Construction - Architect: Perkins & Will - Sales Rep: Hamilton Associates

Dental office: Arlington, VA - Installer: Unique Construction - Architect: Antonio Sofan

SO LIGHT and SO ACOUSTIC

Incorporating good acoustics is essential in large public spaces, restaurants or medical facilities where discretion is required. For these reasons, CLIPSO® offers an Acoustic Translucent covering that can achieve a 40% light transmission.

and SO DECO

Discover what inspires you with SO® DECO printed coverings. Wide-span printing is available on CLIPSO Standard, Translucent and Acoustic coverings. For the most unique and customized design ideas, the possibilities are endless with SO DECO by CLIPSO.

Restaurant: Belgium - Installer: MonaVisa

Macy's Flagship Store: New York, NY - Installer: CLIPSO
